SUPPLEMENT

Furniture of America®

THIS IS FURNITURE OF AMERICA.

Do you remember the first time you bought a piece of furniture? That feeling of finally having it? That feeling that you earned this and your home needs this? That smile?
That is why Furniture of America exists. That joy that people feel when they add something to their homes, to their lives. FOA's identity is rooted in happiness and a desire to spread it wherever our furniture goes. Joy is the foundation of our products, the principle behind our environmental commitments, and the driving force behind our company culture.

OUR PRODUCTS

Why furniture? The answer is simple. Everyone uses it and it lasts a long time. We want everyone to pick FOA, and enjoy their Furniture of America products for years to come. With our wide selection we have products that are perfect for any size home. We hope that whenever someone opens FOA furniture they're filled with excitement knowing their home is about to get a little bit better. Maybe it's the dining set they wanted for months. Or the bunk bed for their kid's room. Or even a coffee table that ties the whole living room together. Each item brings something to their homes and lives.
Even with thousands of products available we want to continue evolving and bringing people the best the industry has. We continue to innovate and find new ways to improve furniture and the lives they touch. Our portfolio of patents offers unique designs, functional utilities, or increase safety and stability. One of our innovations is LED embedded furniture patent. Its widespread use throughout the industry benefits the daily lives of millions of consumers. We make all of our innovations in hopes of improving customer experiences.

OUR COMMITMENT

We believe sustainability and ecological responsibility are necessary tenets of business. Our commitment to sustainability goes beyond a minimal effort. It holds a special place in our company, and is something we consider in every decision we make. We make every effort we can to reduce our carbon footprint, to give back more than we take, and find joy in forward thinking solutions. We are committed to making FOA products using sustainably farmed lumbar. Every tree used has two trees planted to replace it. It's a simple policy that keeps our products honest. Our wood is reliably certified by the Forest Stewardship Council, a recognized standard setter for forest products. Sometimes our search for green solutions takes us to the cutting-edge of technology. We enthusiastically use environmentally progressive materials, like poly-threads made of recycled water bottles, in some of products. When you pick an FOA product, you can be happy about what it is made with and how it was made.

OUR CULTURE

A company is only as good as its people, and at FOA we are all family. Every FOA family member commits their day to making someone's life better. This passion extends to our partners and the community. We offer unparalleled customer support programs that help build our partners' business. We commit to organizations that champion community building and contribute to local causes. When we say family it means more than just a word, it's a way of thinking and connecting to each other. This is an employee-owned "family" business where everyone gets a chance to add their name to the ownership pool. We all have a voice here. We all have responsibility here. And we all share in those commitments because we know that "Together, we make life better."

Let's Connect

WEBSITE | WWW.FOAGROUP.COM

Our website is an excellent resource for all your dealer needs. With a Dealer account, you will have access to inventory, stock status, pricing, and most importantly order placement, so you can skip the phone lines and save precious time! High-resolution images and assembly instructions are also available for download. You can also access our Customer Service Form for any concerns or questions you may have.

NEWSLETTER

For those who want their news delivered to their inbox, there's the FOA Newsletter! We intermittently send out emails to our subscribers containing announcements and promotions. And we promise, we won't flood your inbox!

TESTIMONIALS | WWW.FOAGROUP.COM/TESTIMONIALS

We are proud to see many of our partners grow, and it motivates us to try even harder. We asked a few of them to share their stories and experiences with FOA.

SOCIAL MEDIA

We love engaging our customers. If you and your business are active in social media, please follow us to get the most recent news, promotions, and happenings about Furniture of America. We are on Facebook, X, Instagram, Pinterest, and Youtube as FOAGROUP!

BLOG | WWW.FOAGROUP.COM/BLOG

Read about our products, industry news, and even furniture trends in the FOA blog! We have recaps of the Las Vegas and High Point Markets, company news and announcements, and articles about the latest seasonal and color trends.

AFFILIATIONS

Since our inception in 2007, our involvement in the furniture industry has significantly grown year over year. We now proudly work with industry leadership groups, and support local and national associations for humanitarian efforts. We align ourselves with organizations that share our vision of focus on people, passion, and values.

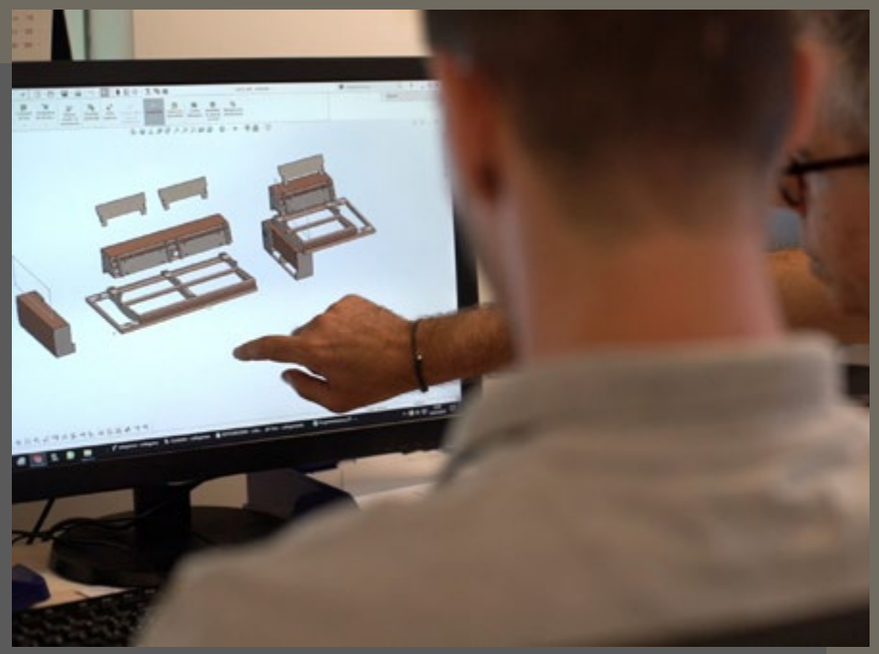
Bringing Ideas into Reality

We believe that every design should have a story. Once our inspiration is clear, we begin sketching concepts, which go through multiple reviews and development until they become digital 3D models that can be prototyped. The consumer only sees the final product in the showroom, but rest assured that we have put the time and effort of multiple teams to design the final product you are looking at.

DESIGN

Furniture design trends come and go quickly, but people's pursuit of quality of life, product functionality, and safety will never change. We keep our finger on the pulse of the industry and look ahead as to what's coming up. Whether we're taking influences from the fashion industry or brand influencers, we collaborate and design products that reach the market quickly and ready to set the next trend. When selecting materials we know how to balance aesthetic value and safety.



FUNCTIONALITY

When we bring a product to our customers we include as much usability as we can fit. Whether it's adding a hidden drawer to a nightstand or an imbedded USB plug in to a headboard, our goal is to add functionality wherever it lends itself to the design of the piece. Details like that elevate a piece of furniture beyond its aesthetic value allowing you to get the most out of an item. We want to make your life easier and more comfortable.

Most of our utility patents stem from our desire to improve the safety of a product. Futons are great products because they fill a niche and double their functionality as a seat and a bed. Our patented fold out leg hides behind the zip-down backing to quickly add stability to a futon in the lowered position, letting you lay out without worry of the futon turning over. It is innovative and practical additions like this that make our products stand out as a smarter and secure choice.

SAFETY

We do not cut any corners when it comes to safety. We pride ourselves on durability and quality control. Our products undergo extensive testing to ensure they meet or exceed all safety standards and requirements. Any that fail to pass either require design changes or will be dropped. We also make sure, all of our paint is lead free, and our foam fillers are free of carcinogenic chemicals.

Our bunk beds achieve high marks in the industry for their safety features. We hold multiple design patents for bunk beds where our main concern is to make them more stable and durable. New designs like an embedded bracket joint structure create a pocket for the rails to fit into. Meaning your children's health and safety isn't left up to a couple of bolts, but a sophisticated metal construction.

If we can prevent injuries, we will make the changes necessary every time.

Our Commitment to Sustainability

At Furniture of America, we're doubling down on sustainability, weaving it into every aspect of our operations. From the products we craft to the practices we adopt, environmental responsibility guides our journey. Our dedication is evident in the materials we choose, with FSC and OEKO-TEX certifications ensuring eco-conscious sourcing. Embracing innovation, we've transitioned to rubberwood for our bunk beds and youth products, minimizing environmental impact without compromising quality.

Beyond product design, we've taken concrete steps to reduce our carbon footprint. Our headquarters partly run on solar energy, exemplifying our dedication to renewable resources. Furthermore, we actively promote sustainability on a personal level, encouraging employees to embrace electric vehicles for their commutes. At FOA, sustainability isn't just a goal; it's our way of doing business.

RUNNING ON RUBBERWOOD

In recent years, our factories have transitioned to using rubberwood as the primary material for our bunk beds and children's furniture. More renewable than pine, rubberwood is harvested from rubber trees that have finished their latex production, repurposing them efficiently and reducing environmental impact. This strong, dense hardwood is resistant to wear and tear, cost-effective, and adapts well to various finishes and colors, offering a wide range of styles and looks. By choosing rubberwood, we contribute to a more sustainable and eco-friendly industry.

FSC AND OEKO-TEX CERTIFIED

Since 2021, we've increased our production of FSC and OEKO-TEX certified products, underscoring our commitment to sustainability and ethics. Our greemotion® line of outdoor furniture, FSC-certified, offers timeless designs and multifunctionality, reducing the need for more purchases. Meanwhile, our new upholstery pieces are OEKO-TEX certified, prioritizing toxin-free materials and eco-friendly production, ensuring a healthier home and planet.

GOING SOLAR

Our relocation to a new headquarters in late 2023 not only marked a shift in company focus but also underscored our rededication to environmental stewardship. With solar panels covering up to fifty percent of our new building's roof space, we generate ample renewable energy to sustain our operations.

MINIMIZING OUR CARBON FOOTPRINT

In addition to our corporate efforts, we empower our team to embrace eco-conscious living. Approximately one in five FOA employees opt for electric vehicles for their daily commute. Moreover, our EV charging station facilitates sustainable transportation, with ongoing expansion plans to accommodate increasing demand.

FOA: Renewed

We've renewed our pledge to sustainability, prioritizing eco-conscious practices in our product crafting. Discover our latest upholstery and outdoor pieces, proudly FSC and OEKO-TEX certified for a greener future. We're also enhancing sustainability at corporate and personal levels by installing solar panels, adding EV chargers, and encouraging our employees to drive electric vehicles.

Product Dimension Guide

We provide accurate dimensions for our products so you can properly plan your room layout or fit it into the empty space you have at home. Catalog photos don't always give you the best perspective on size, and large showrooms can often make a piece look smaller so proper measurements will help you decide if a product is right for your home. The diagrams to the right help decipher how we measure our products so you can use painter's tape to mark out exactly how a piece will fit in a room.

Another thing to consider is how a piece will be transported into your home. Will you need to get a truck? If you live in an apartment, does it have a freight elevator? Does that beautiful Chesterfield sofa you just bought fit through your doorway? Pull out the tape measure and save yourself future disappointment.

FOA

PREMIER

This is where design leads the conversation. Across dining, bedroom, accent, office, and upholstery, each piece is shaped by intentional lines, balanced proportions, and a refined modern sensibility. Organic forms soften architectural silhouettes, creating a look that feels both elevated and effortless. Timeless yet current, these designs are made to anchor a space—quietly striking, thoughtfully composed, and unmistakably refined.

ACCENT CHAIRS

When One Piece Changes Everything

Accent chairs may be small in scale, but their impact is anything but. Often seen as finishing touches, they quietly hold the power to shape a room's entire mood. The right accent chair doesn't just complement your décor—it anchors it, setting the tone and drawing the eye. Thoughtfully chosen, it becomes a statement of style, a moment of personality, and the starting point from which the rest of your space beautifully unfolds.

HAMMERED

Imagine if your home carried the quiet confidence of sculpted metal—light catching textured surfaces, soft linens balancing strength, stone and steel living in harmony. Hammered transforms everyday spaces into curated moments, where bedrooms, dining rooms, and gathering places feel intentional, elevated, and effortlessly refined.

Furniture Care Guide

IMPORTANCE OF PROPER FURNITURE CARE

After spending so much time picking the perfect furniture for your home, you want them to look beautiful as long as you can. And that's possible with regular cleaning and care. Doing some regular maintenance will keep your furniture looking great and extend its durability. You won't find yourself thinking about buying new chairs in a few a years if they look just as good as when you bought them. If dirt and grime is left on your furniture it not only looks bad but can be abrasive to the material and cause damage to your precious furniture. Regular cleaning can also help you control allergens and odors that make living uncomfortable.

Proper care can be as simple as proper placement. Avoid placing furniture where it will be hit by sunlight for extended periods of the day as that will fade colors and cause materials to weaken and crack. Unless your furniture is made of teak or other materials resistant to temperature fluctuations do not place furniture near heat sources, i.e. heaters and radiators. Dry heat will dry the wood and shrink it, leading to cracks and a weakened construction.

With proper placement and regular care your furniture will look great and serve you for years to come.

CLEANING TIPS

WOOD

For most cleaning, lightly dampen a soft cloth with warm water and mild dish soap and rub the area. Lightly using water won't harm your furniture, avoid soaking. Avoid harsh cleaners that can damage the finish or sealer. Common blemishes on wood furniture come from hot coffee cups. If you have a white ring left over from a hot item left on your furniture, use a MILD abrasive to get it out. Use your finger for small spots or a soft cloth for large areas. If you have a scratch, shoe polish, and even walnuts, can be rubbed lightly onto a scratch to help cover up any blemishes. Remember, it is always best to rub, brush, or scrub with the grain, not against it.

LEATHER

First remove all dust from the leather area. It is easiest to use a vacuum cleaner with a brush attachment, and make sure to get into any crevices you can. Follow this up by wiping down the furniture with a cotton or microfiber cloth. Mix equal parts water and vinegar to make a simple cleaning solution. Dip the corner of a cleaning cloth into the mix and wring it out. You want a damp cloth to do all of your cleaning. Follow up your cleaning with a dry cloth, make sure you don't let your leather soak as that may ruin the material. For grease stains, wipe off the grease with a dry cloth, and then sprinkle baking soda on the area. Let it sit for a few hours to draw the grease out. Wipe away with a rag.

FABRIC

Put the upholstery attachment onto your vacuum and clean from left to right from top to bottom. The left to right motion helps loosen dirt from the upholstering. For stains, use HOT water with a bit of mild dish soap. Scrub the area, if the upholstering is above the wooden frame; do not let it soak through as it can damage the wood. If this does not get the stain out, then use steam. If you don't have a steam cleaner, you can use the steam button on an iron. The steam should kick out most stains, making it easy for you to blot out. Let the fabric air dry completely before using.

METAL

Furniture is relatively easy to clean. Remove any glass or upholstering, find a nice dry day outside and get to work. Fill a bucket with warm water, add some liquid dish soap. You'll want a nylon scrubbing brush, dip it into the soapy water and scrub down the entire piece. Use an old toothbrush to clean the grooves and corners. Rinse off the piece, use a damp sponge if your piece has fabric. Dry with a towel. For rusted areas, use a wire brush to remove the rust. Apply metal primer to the bare spots, allow it to dry. You can leave it as is or paint over it with a matching metal tone. Apply a car body wax to the metal for some protection and shine.

Assembly Guide

FURNITURE ASSEMBLY TIPS

1 - Make sure the lock or spring washer is placed between the larger flat washer and the head of the screw or bolt. Otherwise, it can damage your furniture and/or lead to unsafe assembly.
2 - Only tighten when instructed to do so. Properly aligned all parts, and then use the appropriate hand tool to tighten. Do not over tighten. If power tools are used, set at the lowest RPMs/power setting available.
3 - When separating parts/components, use caution as to not damage product. Place the contents on a carpeted or padded area to protect them from damage. Ensure furniture rests on a flat and level surface with each leg evenly touching the floor.
4 - Some furniture includes height adjustment knobs underneath each leg. Turn clockwise to lower or counter-clockwise to raise each leg.
5 - Save the instructions and any supplied tools for later maintenance. After two weeks, check and tighten any loose hardware. Repeat every six months thereafter.
6 - Any products over 30” of height must be attached to a wall. Serious injury or death may occur.

ASSEMBLY RATING

The Assembly Rating is a 5-point system that gauges the degree of difficulty to assemble a specific product (with 1 being easy and 5 being difficult). For some products, two people are recommended for safe assembly.

1	Simple assembly, usually requiring some tightening of screws. Average time for assembly: 30 minutes (10-15 minutes for professional assembly service)
2	Average time for assembly: 1-2 hours (15-30 minutes for professional assembly service)
3	Average time for assembly: 2-3 hours (30 minutes -1 hour for professional assembly service)
4	Average time for assembly: 2-4 hours (1-2 hours for professional assembly service)
5	Average time for assembly: 4+ hours (2-3 hours for professional assembly service)
